Art Unit: 3682

The following is an examiner's statement of reasons for allowance:

With respect to the claims as now presented, the rejection to Wiblyi et al., is withdrawn, because the combination of the seal plate having the seal lip extending from the seal plate to the side of the rolling bodies is not shown. While a seal lip is shown in contact with the inner ring, the seal lip does not extend to the side of the rolling bodies. With respect to Colanzi, the seal lip shown in Figure 6 similarly does not extend to the side of the rolling bodies. With respect to Bugmann, this reference does not show the seal contact surface as cylindrical nor parallel to the center axis of the inner race, nor does it show the seal lip extending from the seal plate to the side of the rolling bodies. With respect to Moorman, this reference does not suggest a seal plate, with peripheral edges, one edge attached to the race and the other peripheral edge defined by a seal lip extending from the plate to the side of the rolling bodies. While Moorman shows a seal element having an outer portion secured to the outer ring and an inner seal lip, this element does not constitute, nor suggest, a seal plate having the above claimed arrangement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Hannon whose telephone number is (703) 308-2691. The examiner can normally be reached on Monday-Thursday (6:00-4:30).
